GEDORE MODULE SYSTEM - COMBINE AS PER DIAGRAM

The fields of use for the GEDORE range of tools are just as varied as the tools themselves. The GEDORE modular system has been devised to provide the employee at his place of work with an optimally matched set of tools and a maximum of flexibility in their selection. The many different module variants ensure that tool trolleys and mobile workbenches are equipped as individually required to bring about an exact arrangement of tools for the jobs on hand. Innumerable combination possibilities result from the large selection of pre-configured modules. GEDORE also has an ideal solution on hand for those special cases and requirements not covered by the module range in the form of the iMOD supply offer. It allows for an individual design of the tool modules, precision-adjustment to one's own needs and also ensures a perfect tool arrangement.

A joint basic raster depicts the drawer sizes and module variants. The drawers (blue) - depending on the raster involved - can be individually combined with the tool and distance modules (in colour). Appropriate configuration examples are on Page 005.

GEDORE INDIVIDUAL "I-MODULES"

You haven't found the right tool modules?

Then simply create your own perfect tool arrangement based on corporate design requirements and process specifications. Have a word with us!

GEDORE

WORKSHOP FURNITURE...

Intelligently designed - dependable under extreme use

Form and function perfection

- > Whether mobile or stationary: indispensable aids, in fact, for the rough-and-ready of workshop routine
- > Extremely robust, scratch and impact-resistant, corrosion-proof and easy to care for
- > Durable and highly resilient with stability of the highest-order
- > Numerous models to reflect use and individual requirements
- > Varied, optional accessories available for flexibly extending all the basic models
- > Specific colours (RAL) and outfits on request

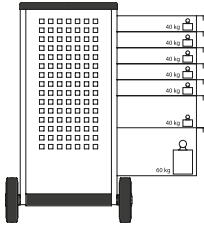

Best-possible quality for the highest demands placed

- > Use of the most up-to-date machinery and environmentally-friendly production processes
- > The basis is tightly-controlled and choice sheet steel
- > Experienced and reliable specialists vouch for precision-like processing
- > Stringent quality checks after each production step ensure a constantly high level
- > Best-possible industrial quality for those extreme levels of constant use and conditions subjected to
- > Professional service up to the development of special customised tools
- > Vertical and horizontal forces are calculated with precision
- > Unloaded weight optimisation from a finely-tuned material input
- > Robust and stable sheet steel structure
- > Precision spot welding ensures components stay permanently fixed
- > Durable and highly resilient with stability of the highest-order

1 Powder coating

- > This coating method guarantees a high level of corrosion protection, combined with tough scratch resistance
- > Powder coating is kind on the environment. Unused powder is reclaimed in the plant. No solvent is used
- > Special colours available on request

2 Load capacity

- > The load capacity of the drawers is 40 kg
- > Models 2004*, 2005, 1502, 1504, 1504 XL, 1506 XL: The bottom drawer is designed as heavy-duty drawer, load capacity 60 kg

Ball bearing drawer runners

- > The ball bearing drawer runners ensure safe and easy sliding of the drawers, even when loaded to full capacity
- > Full extension improves access

3 Smooth running and high-performance wheels

Smooth running wheel (swivel castor)

- > Tyres made from solid rubber
- > The precision ball bearing consists of balls which run between an inner and outer hardened ring. Well-proven under extreme loads and at high speeds.

High-performance wheel (fixed castor)

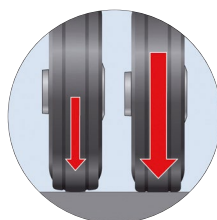

- > Tyres made from solid rubber, high load capacity, resistant to abrasion
- > The rim is made from high-quality casting.
- > The roller bearing consists of rollers made of steel or stainless steel within a cage, which rotate between the axle tube and the wheel hub.
- > The GEDORE smooth running and high-performance wheels keep, even under maximum load, the following features: Smooth running, track-keeping and manoeuvrability!

in unloaded state

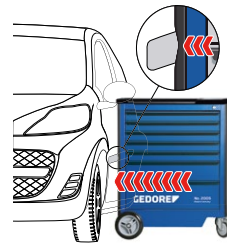

with maximum loading

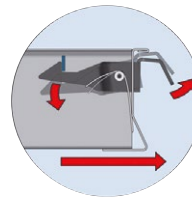

- > On conventional industrial wheels, there is a visible and perceptible change in handling under maximum loading. The high rolling resistance makes it almost impossible to move the mobile equipment when fully loaded. There is an increased risk of the tyre parting from the wheel, which could lead to an accident!

4 Impact protection

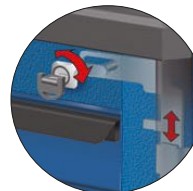

- > The vertical impact protection protects the trolley and anything it comes into contact with from damage
- > It also protects other equipment in the workshop or vehicles from inadvertent contact

5 Individual drawer locking

- > In addition to the central locking, each drawer has its own separate latch to prevent unwanted opening, when being moved
- > The latch is automatically released by a tilting bar when the drawer is opened
- > The single latch automatically engages when the drawer closes

6 Central locking

- > One central lock for all drawers and doors
- > Safe and easy handling

7 Square perforation 10 x 38 mm

- > The square perforation in the side walls enable quick access to frequently used tools
- > GEDORE holders and trays are simply clipped in

8 Heel protection edge

- > All-round heel protection by rounded edges on the underside allows the trolley or workbench to be safely pulled or pushed

9 Total brake

- > Prevents unwanted movement and turning of the wheel
- > Ensures safe parking of the trolley or workbench

1507 XL MOBILE WORKBENCH

extra-wide drawers

from **€1509,00**
excl. VAT

Body:

- > Dimensions: H 985 x W 1200 x D 635 mm
- > 30 mm thick multiplex beech wood worktop, surface additionally protected by linseed oil varnish
- > Worktop set back to park flush against the wall
- > With handle for easy pushing, pulling and turning
- > Side walls with Euro perforation 10 x 38 mm to fix hooks and tools
- > Ready to take up tool holder KL-5501-20 for installation of spring compressor KL-5501
- > Heel protection for personal safety
- > Sheet steel, corrosion resistant and scratch-proof powder-coated, GEDORE blue

Drawers:

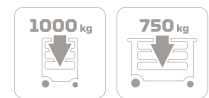

- > Central locking with cylinder lock
- > Wide drawers (W 998 x D 474 mm) fully extending, removable
- > **Individual drawer locking** stops more than one drawer from opening, one-handed operation
- > Guide rails on ball bearings with **self-closing**
- > Load capacity per drawer 70 kg
- > Sheet steel, corrosion resistant and scratch-proof powder-coated, GEDORE blue

GEDORE high-performance chassis:

- > Total load capacity **1000 kg, 750 kg** when mobile
- > 2 high-performance wheels on roller bearings (fixed castors Ø 200 mm)
- > 2 GEDORE smooth running wheels on ball bearings (swivel castors Ø 125 mm), both with total brake
- > Even under maximum load, the GEDORE trapezoidal axle construction remains smooth running, manoeuvrable and keeps on track

Options:

- > Ideal for equipping with GEDORE tool modules (1500 ES/1500 CT and TS ranges) maximum 9 pieces 1/3 modules possible per drawer
- > Tools and accessories not included
